Experience

Frontend Developer Internship | Certificate   Jun 2023 - Current
Frontend Simplified

- Transformed a completely static HTML, CSS, JavaScript and React single page application into an interactive user interface using animations, transitions and carousels.
- Processed API requests with Axios to dynamically represent data from a cloud server and represented it through skeleton loading states, pagination, and dynamic routing.
- Utilized Git version control and the GitHub interface to work and thrive in a virtual and collaborative team environment.

Projects

Netflix Clone | Website | GitHub
- Created a fully responsive Netflix clone with use registration and paying methods. The API for the movies was TMDB API.

Disney+ Clone | Website | GitHub
- Developed a Disney+ clone with different pages in react with reusable components and different styling methods, fully responsive as well, made with self-created API.

Twitter Clone | Website | GitHub
- Developed with no API just pure React + JavaScript, fully responsive, with multiple functions that really add to the project.

Internship Project | Website | GitHub
- Created with pull requests adding a couple of features using a created API.

Education

Frontend Developer Bootcamp   **Aug 2022 – Jun 2023**
Frontend Simplified
